

**DEPARTMENT OF THE ARMY
U.S. Army Corps of Engineers
Washington, DC 20314-1000**

ETL 1110-2-367

CECW-EH-Y

Technical Letter
No. 1110-2-367

31 March 1995

**Engineering and Design
INTERIOR FLOOD HYDROLOGY**

Table of Contents

Subject	Paragraph	Page	Subject	Paragraph	Page
Chapter 1					
Introduction			Plan Comparison	3-10	3-19
Purpose	1-1	1-1	Summary	3-11	3-20
Overview of Interior Flood Hydrology			Chapter 4		
Concepts	1-2	1-1	Line-of-Protection and Minimum		
Organization of Document	1-3	1-2	Facility Analysis Concepts		
Program Document	1-4	1-3	Overview	4-1	4-1
Chapter 2			Without Line-of-Protection Condition		
Analysis Concepts and Procedures			Analysis	4-2	4-1
for Interior Areas			With Line-of-Protection and No Interior		
Overview	2-1	2-1	Facilities	4-3	4-1
Planning Study Phases	2-2	2-1	Minimum Facility Analysis	4-4	4-3
Hydrologic Engineering Studies	2-3	2-1	Summary	4-5	4-6
Study Setting	2-4	2-1	Chapter 5		
Initial Preparation	2-5	2-2	Analysis of Interior System Flood		
Relationship Between Interior and			Damage Reduction Measures		
Exterior Stage	2-6	2-2	Overview	5-1	5-1
Interior Analysis Computational Methods ...	2-7	2-3	Without-project Conditions	5-2	5-1
Summary	2-8	2-5	Flood Damage Reduction Measures	5-3	5-3
Chapter 3			Interior Analysis Using HEC-IFH	5-4	5-8
HEC-IFH Program Concepts and			Comparison of Plans	5-5	5-11
Applications			Plan Performance	5-6	5-12
General	3-1	3-1	Chapter 6		
Computer System Requirements and			Study Documentation		
Program Structure	3-2	3-1	General Requirements	6-1	6-1
Program Menu Structure	3-3	3-1	Content Related to Planning		
Program Configuration and Data			Considerations	6-2	6-1
Management Utilities	3-4	3-1	Content Related to Design		
Program Application Structure	3-5	3-1	Considerations	6-3	6-1
Define Interior Analysis Data	3-6	3-4	Reporting Capabilities of HEC-IFH	6-4	6-1
Interior Analysis	3-7	3-16	Appendix A		
Analytical Procedures	3-8	3-18	References		
Analysis Summaries	3-9	3-19			

Subject	Paragraph	Page	Subject	Paragraph	Page
Appendix B Glossary of Terms			Appendix D Case Study for Analysis of Interior Flood Damage Reduction Measures, Napa River, Napa, California		
Appendix C Hydrologic Engineering Management Plans for Analysis of Interior Flood Damage Reduction Measures, Napa, California			Appendix E Case Study for Interior Flood Damage Reduction Measures, Valley Park, Missouri
